

The full 101 Amazing Apprenticeship Activities for Schools resource can be accessed for free on our website: www.amazingapprenticeships.com/resources/101-amazing-apprenticeship-activities

ACTIVITY OVERVIEW

Your class challenge is to create an apprenticeship assembly that can be delivered to your year group. We would like you to research apprenticeships in detail and to then present your findings in a creative way to their year group. It should be inspirational and informative – whilst interesting and fun.

WHAT TO INCLUDE

We encourage you to be as creative as possible and use technology such as film, animation, Power Point, posters, handouts.

Some ideas for topics that you could cover within your assembly could include:

- What is an apprenticeship?
- The range of job roles available
- The different levels of apprenticeships
- The benefits of apprenticeships
- What are the entry requirements?
- What is a training provider?
- Where do you find out about jobs available?
- What can you earn?
- What is the application process like?
- What is an unusual fact?

ENTER THE NATIONAL COMPETITION

We are running a competition amongst schools in England to send us a film of their assembly, along with any accompanying evidence.

If you would be interested in submitting your assembly for the National Assembly Challenge to be in with a chance of winning an amazing prize worth £250 for your year group, then let us know by emailing hello@amazingapprenticeships.com

The closing date for entries is Friday 15th June 2018.
