

Using the Key Stage 3 Apprenticeship resources

A guide for Heads of year, teachers and Careers Leaders

The Apprenticeship Support & Knowledge for schools and college (ASK) programme is fully funded by the National Apprenticeship Service, part of the Department for Education.

Through this programme, every school and college in England is entitled to access a programme of support for their schools for students in years 10 – 13.

To complement this offer, we have introduced a suite of resources for students in years 7, 8 and 9 to help them to build their knowledge and awareness of apprenticeships from a younger age.

How will the resources work?

The resources are split into years 7, 8 and 9 and contain core materials:

1. A central apprenticeship presentation and script to be delivered by the teacher to the whole year / individual classes.
2. A student activity pack (7, 8 and 9)
3. An accompanying teacher handbook (7, 8 and 9) with instructions and answers.

What is the objective?

Through these resources, we aim to provide age-appropriate information about apprenticeships for students so that they can start to consider it as part of their longer-term options beyond school.

Year 7 – Imagine

Through these activities, we aim to introduce apprenticeship language and to help students to start considering the different types of job roles available, which could include apprenticeships.

Year 8 – Inspire

Through these activities, we aim to start introducing inspirational messages about individuals and employers who offer apprenticeships.

Year 9 – Inform

Through these activities, we aim to provide information about the range of apprenticeships including levels and detail about different job roles available.

What next?

Visit <https://amazingapprenticeships.com/resource/key-stage-3-resources/>

Enter your details and you will be able to download the materials for free.

We would value your feedback later in the year about how you have found these resources, any improvements or changes that you feel should be made and any ideas for new resources to add in.
