Important information

As of the date of publication, all the courses featured were correct. It is important you contact the provider for the most up-to-date information.

Welcome!

HTQs are post-18, level 4 and 5 qualifications that you can study at colleges, universities or other training providers. They have been approved by employers as delivering the skills they need because they are high-quality, job-focused qualifications.

This Higher Technical Qualifications (HTQ) course listing includes the full list of HTQ options throughout England, correct as of 17th March 2025.

The qualifications in this listing are organised by Occupational Route (subject area), making it easy to search for courses relevant to your area of interest. As all providers will display their courses in different ways, a link to the provider's website is listed, allowing you to then navigate to the HTQs they offer. Make sure you look out for the HTQ logo, so you know it is an employer-approved course.

Explanatory notes

Course title abbreviations

You will see some abbreviations throughout the listing which are explained below. HTQs include approved qualifications such as:

- **CertHE** Certificate of Higher Education
- **DipHE** Diploma of Higher Education
- **FdA** Foundation Degree
- **FdSc** Foundation Degree in Science
- **FD** Foundation Degree
- **HND** Higher National Diploma
- **HNC** Higher National Certificate

Qualification levels

A-levels and T Levels are level 3 qualifications and full undergraduate degrees are level 6 qualifications. HTQs are either level 4 and 5, meaning they sit between A-levels/T Levels and a full degree.

You can find out more about qualification levels [here](#).

Course credits

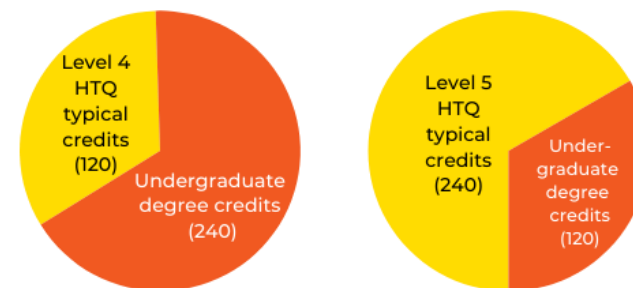

HTQs at both level 4 or 5 earn credits:

Level 4 – typically 120 credits

Level 5 – typically 240 credits

These credits can then be used to progress onto further study, for example a degree or an apprenticeship. HTQ credits can be topped up and turned into a full undergraduate degree, for example.

Typically, 360 credits are needed in total to complete an undergraduate degree:

HTQ subject areas

HTQs in these subject areas are available now and you will see them in this listing.

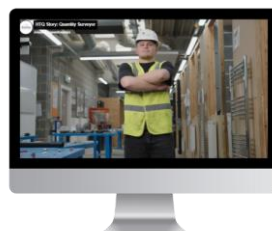

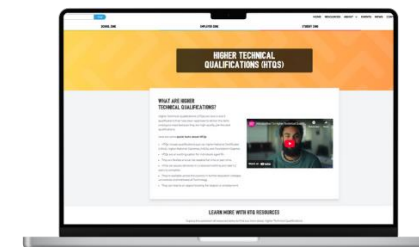

HTQs in these subject areas are available from September 2025 and you should be able to find out more from provider websites about which HTQs they are planning to offer.

Find out more about HTQs

If you'd like to know more about HTQs, we have many resources you can explore on the Amazing Apprenticeships website, including guides, webinars quizzes, films, case studies and more.

amazingapprenticeships.com/higher-technical-qualifications-htqs/

KEY FACTS ABOUT HTQS

HTQs are level 4 and 5 qualifications

They are for people aged 18+ who have a level 3 qualification like A levels or a T Level.

They're taught in further education colleges, universities and Institutes of Technology.

An HTQ will usually take 1-2 years to complete.

HTQs are flexible and can be studied full time or part time.

HTQs are typically delivered in classroom settings.

Students are able to access the same student finance as a degree.

HTQs could lead into an apprenticeship, full degree or employment.
